REQUEST FOR ENTRY OF
CERTIFICATE OF CORRECTION

Sir:

Please enter the enclosed Certificate of Correction (PTO
Form 1050) in the above patent.

The errors sought to be corrected were made by

☒ The Patent and Trademark Office as explained below.
Thus, no fee is required for the Certificate of
Correction pursuant to 37 CFR §1.322.

☐ Applicant(s) (at least in part). See next section
for explanation. This appropriate fee under 37 CFR
§1.323 has been authorized below.

Attached as Exhibit A (2 pages) is a copy of the relevant
pages of the Amendment dated June 16, 2008, which supports the
requested corrections to Claim 16, and shows that the errors
were made by the U.S. Patent and Trademark Office.

APR 20 2009

As shown in Exhibit A, Lines 1-2 of originally numbered Claim 18 (renumbered in the Patent as Claim 16) read "a computer system comprising:". The same line in the patent at Column 94, Line 51 reads "a computer system: comprising:". Specifically, the semicolon between "system" and "comprising" should be removed.

As also shown in Exhibit A, Lines 17-18 of originally numbered Claim 18 (renumbered in the Patent as Claim 16) read "at least one managed product." The same lines in the patent at Column 94, Lines 66-67 read "at least one managed: product." Specifically, the semicolon between "managed" and "product." should be removed.

The Commissioner is hereby authorized to charge any fees required for consideration and entry of the enclosed documents, and to credit any overpayment of fees to Deposit Account No. 50-0553.

Please direct all inquiries concerning this request to the undersigned attorney.

at least one managed product coupled to said security management agent.

16. (Previously presented) A method comprising:
receiving a plurality of normalized events generated by managed products by a network security feedback and control system from a security management agent; and
using information in said plurality of normalized events by said network feedback and control system in dynamically implementing a predefined security policy by issuing at least one normalized command in response to a predefined event in said plurality of normalized events to a security management agent for passing to at least one managed product.

17. (Currently amended) A computer-program product comprising a tangible computer-readable medium configured to store ~~containing~~ computer program code for a method comprising:
receiving a plurality of normalized events generated by managed products by a network security feedback and control system from a security management agent; and
using information in said plurality of normalized events by said network feedback and control system in dynamically implementing a predefined security policy by issuing at least one normalized command in response to a predefined event in said plurality of normalized events to a security management agent for passing to at least one managed product.

18. (Currently amended) A ~~structure~~ computer system comprising:
a processor; and

a memory coupled to said processor, said memory
having stored therein a security management system, said
security management system comprising:

means for receiving a plurality of normalized
events generated by managed products by a network
security feedback and control system from a security
management agent; and

means for using information in said plurality of
normalized events by said network feedback and
control system in dynamically implementing a
predefined security policy by issuing at least one
normalized command in response to a predefined event
in said plurality of normalized events to a security
management agent for passing to at least one managed
product.
